Uniweld

THAKUR INDUSTRIES

Welding & Cutting Automation

MAKE IN INDIA

Manufacturers of CNC Welding, Cutting & Special Purpose Machines

THAKUR INDUSTRIES

"Uniweld" Welding & Cutting Equipments

ABOUT US

"THAKUR INDUSTRIES" started its operations in 1987. With manufacturing experience in **Special Purpose Machines (SPMs)** for **welding, cutting**, and their allied industrial applications, our machines are designed as per customer requirements. We offer various welding solutions for steel, stainless steel, aluminum, copper, and other materials in an affordable manner. These machines are simple and easy to operate and maintain. The machines are designed to be stiff and robust.

Our main products consist of **SPMs & CNC cutting & welding machines**.

We are a professionally managed organization that provides quality welding equipment at an economical price to meet your various requirements. We ensure prompt and timely delivery of our range. We can also package our consignments as per the specifications provided by clients.

THAKUR INDUSTRIES is committed to providing technology, user-friendly products, and high-quality services to achieve customer satisfaction.

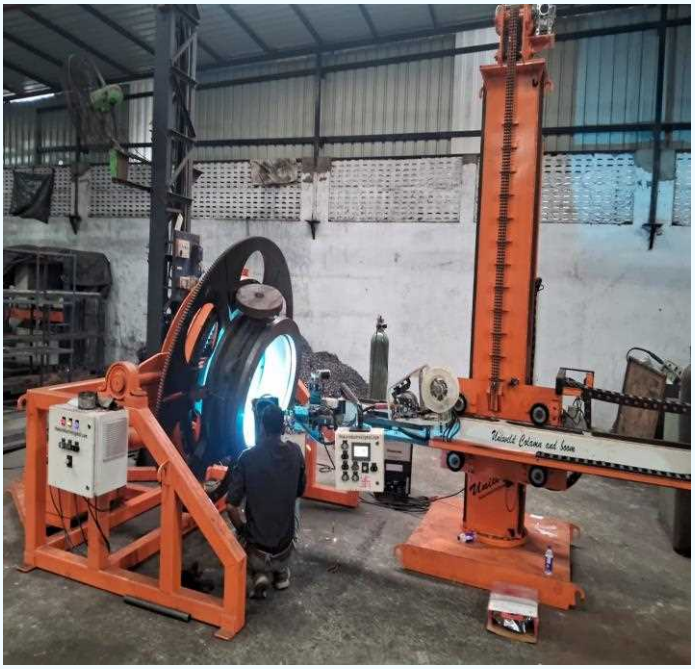
Welding Column & boom & Positioner

Application :

- Pressure vessels
- Pipe lines
- Wind power fabrication
- Tank and drum fabrication
- Heavy metal structure

Features :

- Rugged and economical design.
- "Jerk" Free vertical and horizontal Movement.
- Most Suitable for medium to heavy fabrication shop.
- Assured High quality welding with reduced labour and manpower.
- Safe design with easy movement.
- Can be associated with welding rotator and positioner



Uniweld

Wearplate cladding System

Duel Torch & Four torch

Dual Torch

Four Torch

Uniweld

Special Purpose Machine.

Welding lathe

Tank Rotator, Job Rotator

Welding Turn Table

Welding Positioner

***Welding lathe**:Automates high-repeatability circular welds.*

***Welding Positioner**: For precise 360-degree manipulation of complex parts.*

***Welding Turn Table** : Provides smooth, variable-speed rotation for perfect welds.*

***Tank Rotator, Job Rotator**: Ideal for welding large cylindrical vessels and pipes.*

Uniweld

Special purpose machine: Pipe ID Cladding

Pipe ID Cladding

Welding lathe for valve body welding

Nozzle welding SPM

Linear welding

Uniweld

Welding Lathe For circumferential & Linear welding.

SPM for tank welding

SPM for Pipe To Flange welding

SPM for tig welding with auto tig

SPM for compressor tank welding

Uniweld

SPECIAL PURPOSE MACHINE: Dual torch MIG welding

Automated ***dual-torch*** *system for automated circular welding on cylindrical parts.*

Uniweld

Special Purpose Welding Machines.

"H" Beam Welding machine

Automatic H-Beam Welding Machine Designed for high-speed, continuous fabrication of structural **P.E.B** Beams.

Compressor tank welding machine

Transformer fins welding machine

Uniweld

Other Special Purpose Machines (SPMs)

SPM For Cable Tray welding

- Automates the welding of rungs to side rails.
- Handles multiple tray sizes and patterns.
- Dramatically increases production speed.

CNC Linear welding SPM

- Fully programmable for precise straight-line welds.
- Ideal for thin plates, and long seams.
- Reduces operator error and post-weld grinding.

Welding positioner

SPM for vertical welding

Uniweld

CNC PROFILE CUTTING MACHINE.

Cnc Gentry Profile Cutting Machine

Cnc Table Type profile cutting machine

Cnc Plate–Pipe Profile cutting machine

A versatile 2-in-1 CNC solution for high-precision profile cutting on both flat plates and pipes.

Cnc Pipe Profile cutting machine

Automated CNC machine for precise profile cutting of pipe saddles, holes, and bevels.

Uniweld

CNC DRILLING & MILLING MACHINE

Our Products:

- CNC Oxy fuel / plasma profile cutting machine.
- CNC profile pipe cutting machine.
- CNC welding machine up to 6 axis (as per requirement of customer)
- CNC Wearplate cladding system,
- Linear SPM. For TIG & MIG welding application.
- Special purpose machine for welding & cutting
  - Welding lathe for circumferential cum linear welding (for MIG, TIG, SAW)
  - Column & boom 2x2 , 3x3, 4x4 6x6 mtr. Or for the purpose of Welding of vessels, tank, etc. with MIG, TIG, SAW, welding head as per Requirement.
  - Job Rotators, suitable for rotating of heavy vessels.
  - Turn table for MIG , TIG welding purpose
  - Positioner for TIG , MIG & SAW purpose.
